# Freestanding Outback Series

With clever design features and Jindara's pre-heated primary air technology, the freestanding Outback Series is certain to impress. Loading firewood has never been easier, with the flat-window models encompassing a tall ergonomic pedestal. Should you simply wish to be absorbed by the flickering flames, the elegant bay window models will provide a stunning view.

## Sturt

The Jindara Sturt is known all around Australia for its functionality and hardworking nature. This tough as nails radiant style unit has an exceptionally deep firebox, allowing you to fit logs that similar sized units would be envious of. The Sturt also incorporates a radiant cook top for your pots and pans, as well as a raised shelf for simmering. The Jindara Sturt truly is a tireless contributor to any Aussie home.

- ⊕ Boil & simmer on top or back shelf
- ⊕ Firebrick lined
- ⊕ Extra deep firebox for easy loading
- ⊕ 10 Year firebox warranty
- ⊕ Tall pedestal for easy loading

# From our family to yours...

After WWII and seeking new opportunities, Frank Gason, his wife Jean and their young family moved from Geelong to Ararat, Victoria and started AF Gason Pty Ltd.

Since 1946, continuous generations of the Gason family have lived and worked in this Rural City, with their presence remaining strongly felt in the community to this day. As the company has grown it has become one of the largest regional employers in the area, with the Gason name recognised not only locally but also nationally and internationally.

With core values of honesty, respect and openness, the family endeavour to ensure the wellbeing of staff, their families and the community is paramount. The importance of achieving an effective work/life balance is considered in the daily operations of the company – in fact one of the operational rules is to value family life within the community! From supporting local churches, schools, sport clubs and community groups through to finance, advice, leadership, and participation, Gason are committed to this great part of country Victoria.

Always striving to ensure the sustainability of employment through good times and bad whilst demonstrating integrity, ethical conduct, honesty and fairness in all their business dealings, the Gason family desire to provide employees with challenges, opportunities, and personal satisfaction whilst recognising their value and contribution.

From the humble beginnings of the motor trimming business, many members of the Gason clan have worked in the business. At the time of publication, 4 members of the family, spanning 3 generations, fill central roles with the manufacturer:

<b>Les Gason</b>	<b>Chairman of the Board of Directors</b>
<b>Wayne Gason</b>	<b>Managing Director</b>
<b>Morgan Gason</b>	<b>Heater Division Manager</b>
<b>Riley Gason</b>	<b>Industrial Services Engineer</b>

The Gason family is proud of the business's heritage and are committed to continue designing, manufacturing and marketing high quality woodheaters tailored for the Australian market – timeless products that are designed for living and made for generations.

*Frank Gason founded AF Gason Pty Ltd in 1946*

*Gason Tractor Cabin Assembly line, circa 1950s*

# Installation

## Zero Clearance Installation

Don't have a brick chimney, but love the sleek look of a Jindara Insert? All of the Jindara Inserts (exc. double sided range) are Zero Clearance Install compatible using the relevant Jindara Zero Clearance Cabinet. This allows for a broader range of ways to incorporate a Jindara Insert heater into your living space.

### Step 1

### Step 2

### Step 3

A Zero Clearance Cabinet allows for safe installation into timber framework with minimal clearances to the unit. Once your framework is built, it is as simple as cladding the front face with a cement sheet or equivalent, and your Jindara Insert heater is safely installed as a focal point to your room.

Minimum framing dimensions are an indicative guide only. **DO NOT** begin any construction prior to consulting the full Zero Clearance Installation guide for the relevant unit. Full Installation instructions available at [www.jindara.com.au](http://www.jindara.com.au)

#### Minimum Zero Clearance Framing Dimensions

Model	H	W	D
Riverina, Barossa	810	916	565
Kimberley, Hamersley	1063	1036	595
Barwon	868	1035	570
Tilga	1000	915	635
Grange	1000	1055	610

Specifications detail minimum framework opening (inclusive of clearance from Zero Box to combustible framework)

## Elevated Insert Installations

Raising your Jindara Insert installation above floor level? You may be able to reduce your minimum hearth depth to 300mm. Refer to the following table as a guide on how high your unit must be raised to achieve the reduced hearth depth.

	REF	RIVERINA		BAROSSA		BARWON		KIMBERLEY		HAMERSLEY		TILGA		GRANGE	
Hearth width	X	890mm (min.)		950mm (min.)		1035mm (min.)		940mm (min.)		1000mm (min.)		945mm (min.)		1000mm (min.)	
Hearth raised	Y	0mm	155mm (min.)	0mm	132mm (min.)	0mm	197mm (min.)	0mm	175mm (min.)	0mm	205mm (min.)	0mm	175mm (min.)	0mm	140mm (min.)
Hearth depth from front of fascia	Z	530mm (min.)	300mm (min.)	510mm (min.)	300mm (min.)	610mm (min.)	300mm (min.)	550mm (min.)	300mm (min.)	600mm (min.)	300mm (min.)	520mm (min.)	300mm (min.)	550mm (min.)	300mm (min.)

\* Minimum hearth depth in front of unit can be reduced by raising the appliance above combustible materials (Consult your local dealer and/or page 22 of this brochure)

\*\* Mantle deflector required to achieve mantle clearance (included with woodheater)

\*\*\* Hearth must also be installed beneath ZCC - refer to install guide for exact specifications

Notes: ‡ All KW Outputs quoted are Peak Power. † All Efficiencies quoted are Peak Efficiency %. All dimensions are in mm. Dimensions and clearances shown are for reference only. Refer to the Owner's Manual for exact specifications prior to installation.

All information in this brochure was correct at the time of printing, April 2024, however Jindara Woodheating reserves the right to change specifications without notice. Colours shown are as close as printing method allow. Installation should be carried out by a qualified installer. All fireplace inserts must be installed into a masonry chimney or Jindara Zero Clearance Cabinet, and be fully flued.
